Performance Optimization | Prompt engineer

PROJECTS

Intellimax 🔗

Built a modern, responsive website for Intellimax, highlighting services and products with interactive design and smooth user experience.

PSL (Prataap Snacks Limited) 🔗

Yellow Diamond, the flagship brand of Prataap Snacks, is a leading chips brand in India. Developed a React.js WebView module with REST APIs integration, embedded as a feature in the PSL mobile application.

Vyapaar vistaar 🔗

Developed frontend modules for a tech-driven distribution platform to manage real-time inventory and streamline supply chain operations in the FMCG (Fast-Moving Consumer Goods) sector.

Purehug 🔗

Built and embedded React.js WebView modules within the Purehug mobile application, implementing REST APIs integration, structured state management, and dynamic data rendering for Billing and Order Management workflows.

Stack Infinite 🔗

Stack Infinite website is a modern, high-performance platform built with Vite.js and TypeScript. The site reflects the company's innovative approach while providing a dynamic and scalable solution for users.

Voso Vyapar 🔗

Developed an e-commerce management platform to handle products, inventory, and online sales. Built customizable storefronts and inventory features using React.js.

FAWZ 🔗

A wholesale footwear platform offering competitive pricing and flexible order quantities for bulk purchases, designed to assist retailers and resellers with detailed product descriptions and size guides.

EMS Partner Portal 🔗

Built a scalable platform enabling third-party merchants to apply for loans with secure document verification and seamless partner integration.
